

AQUACIL™

FOAMING HAND AND BODY WASH

Aquacil™ Foaming Hand and Body Wash (HBW) is formulated to be mild but highly effective at cleaning the skin. Aquacil HBW contains multifunctional ingredients that provide cleaning, conditioning and moisturization in one product.

Unlike most general purpose washes, Aquacil™ HBW is based on cationic or positively charged surfactants and conditioners that deposit on the skin and resist wash-off. As a result, this product can be used repeatedly at home or institutional environments without compromising the health of the skin. Aquacil HBW is compatible with all other Aquacil and ICS3 products.

Features and Benefits

- Formulated with state of the art skin friendly surfactants and emollients
- Cleans and conditions the skin effectively
- Mild enough to be used repeatedly
- Free of fragrance, parabens, triclosan, and formaldehyde
